

Performance Task Overview

The AP Computer Science Principles Create Performance Task is a required project in which students design and program a computing solution to a real-world problem, then submit their code, along with a short video demonstration, and written explanations to the College Board.

This task counts for **30% of the student's total AP CSP exam score**, making it one of the most important parts of the course.

The PT encompasses three (3) components

- 1. Program Solution**
- 2. Video Demonstration**
- 3. Personalized Project Reference (Code snippet and written response)**

PT Program Solution Requirements

- The Program needs to take in an input. The input can be from a user, a device, a file, or a data stream.
- The Program must have 1 list that represents and collects data.
- The Program must have 1 procedure (Function) that contributes to the programs intended purpose.
- The procedure must take in at least 1 parameter, and have a return statement, if necessary.
- The program must have an algorithm (steps/ instructions) that includes sequencing (operators), selection (conditionals), and iteration (loops) that is in the body of the selected procedure.

All portions of PT assignment must be submitted before April 30th, 2026

PT Video Requirements

The video must demonstrate the program running and working properly

The video should NOT have any Personally Identifiable Information (PII)

The video should NOT have any audio; Comments are allowed in the program

The video should be no more than 1 minute in length

The video should be no more than 30MB in file size

The video can be in any of the following formats

- webm
- mp4
- wmv
- avi
- mov

PT Personalized Project Reference Requirements

Students will need to screen capture code segments of their PT program

Code segments should not include comments or acknowledgements

Code segment text should be at least 10 point font

Code segment must be a function that includes a parameter and uses an algorithm

Code segment must be submitted through the AP Digital Portfolio platform
